Jun 2017-May 2019 Marie Skłodowska-Curie Fellow (Post-doctoral Researcher), Center for Sustainable Development, Dep. Political Science, Ghent University, Belgium. Project “Crowdsourcing Urban Sustainability Governance. Exploring innovative governance models for addressing urban sustainability through ICT-people interaction – CROWD_USG.” Promoter: prof. Thomas Block

The project explored the potential of crowdsourcing (an online, distributed problem-solving process for creative solutions development) to advance innovative urban sustainability governance (USG) models. It was intended to investigate whether and how crowdsourcing is appropriate for dealing with the mutable, multi-scalar and complex character of urban sustainability; for activating real participatory processes in knowledge production and decision-making; and for empowering technological agency of heterogeneous actor-networks to narrow the gap between research results and policy applications. Research hypotheses have been tested against evidence collected through fieldwork in the city of Ghent, whose commitment for achieving urban sustainability goals through people’s participation, technological development and public-private partnerships makes it a forefront example in the European panorama. Scenario Building analysis has been adopted for prefiguring future social, political and economic development determined by the introduction of crowdsourcing processes. Research website https://crowdusg.net/crowd_usg-crowdsourcing-urban-sustainability-governance/

2013-14/2014-15/2015-16/2016/17 (a.y.) Adjunct Professor of “Cultural Geography”, Interdisciplinary Dep. Sciences for Peace, University of Pisa, Italy [*art.23 L. 240/2010, M-GGR01*] (see *Teaching Experience*)
